socialtables

Overview of Social Tables Venue Mapper

Social Tables **Venue Mapper** aims to increase collaboration within teams and between stakeholders in order to streamline the planning process.

- Complete HTML5 Software-as-a-Service platform.
- Cloud-based solution makes it device and operating system agnostic.
- Ideal for sales team to help bring in more business and set expectations for clients.
- Ideal for planning teams to bolster communication and impress clients.
- Encrypted data is stored in redundant databases, passed over SSL (HTTPS).
- True real-time collaboration powered by Socket.io, the same technology Google uses.
- Hosted on the Linode Cloud with 99% uptime and superior security apparatus.

Venue Mapper – Web-based diagramming and design software

- Go from proof-of-concept to completed diagram in under 1 minute using templates.
- Upload and scale pre-existing floor plans, maps or diagrams.
- Store CAD floor plans in a secure library.
- Drag-and-drop items from a fully customizable Scalable Vector Graphics object library.
- Email clients floor plan PDFs for quicker turnaround time (w/bcc capability)
- Export an event's equipment list (pull sheet) for your facilities staff and vendors.
- Generate room setups that adhere to Certified Meeting Planner (CMP) guidelines.
- Firecode view to develop a max capacity matrix

Customer Success

At Social Tables, we pride ourselves on exceptional customer service. Our goal is to make your life easier and do everything in our power to ensure each of your meetings and events are exceptionally executed and meet your clients' highest expectations.

Other than providing initial training for your entire team, our automated training, instructional video library and weekly webinar series can help train your future hires and provide continuing education to your existing employees. Enterprise customers are automatically enrolled in our 24/7/365 support program and our engineering team is on-call for emergency operations.
