

# Admin Interface Refresh Campaign

## Back of House Navigation Enhancement

Administrative portal enhancements continue to modernize the user interface and align with best practices.

### Key Takeaways:

- CaterTrax's primary navigation bar will shift from its traditional position on the top of your screen to the left-hand side.
- Navigation buttons will now read from top to bottom on the left side of the interface versus left to right on the top of your screen.
- All navigation buttons will continue to function in the same way and lead to the same destination.
- This change will allow operators a more clear and consistent view to streamline their use of our system by eliminating the top bar.

Please contact CaterTrax with any additional questions or feedback.
